

3KS19 KS19 EVO GTX

MILITARY & SECURITY

- Originally Designed for and Developed for Arma Suisse (CH Army) as Light Four-season "combat and service suitable for launch" boot, suitable for paratroopers. Suitable for all terrains, even impervious and steep ones.
- Perfect stability for walking on all surface and excellent grip on uneven surfaces through the use of the new Cosmas- Jolly sole Eiger.
- Gore-Tex® Extended Comfort Footwear lining optimal for a wide range of climatic conditions and for outdoor activities
- Breathable and waterproof upper: the breathability of the leather is guaranteed by Top Quality Nubuck selected in European tanneries
- Extremely comfortable for use throughout the day thanks to the PU midsole
- Antistatic sole resistant to oils and hydrocarbons
- Semi rigid insole which gives flexibility to the shoe and stability to the boot
- Rubber scuff cap to protect the toe and back of the shoe from abrasion

Article description: KS19 EVO GTX

Product Code: 3KS19

Upper material

Water-repellent, breathable, Nubuck cowhide, 2.0-2.2 mm thick
Color Brown CH MOD.

Collar

Water-repellent and breathable brown soft calf leather 1.1-1.3 mm thick.

Bellows

Water-repellent and breathable Nubuck brown 1.1-1.3 mm thick.

Rubber Protection Toe and Back

Brown rubber, highly resistant to abrasion.

Ankle Protection

Shaped on the outer side of the footwear using a thermoformed TPU insert completed by padding with high impact absorption properties.

Lining

3-layer heat-sealed laminate (GORE-TEX® Extended) bootie construction:

Layer 1 – 70%PA/30 % PES abrasion resistant lining
Layer 2 - Waterproof and breathable ePTFE membrane 100% PES
Layer 3 -100% PA warp-knitted net

Toe Cap

Non-woven fabric impregnated with thermo-adhesive resins and 1,35 ± 0,05, mm thick.

Heel Cap

Thermoformed Salpa 2,8 mm thickness.

Thread

100% polyamide 6.6 high tenacity yarn with water repellent treatment, brown.

Laces

Round, water-repellent treated polyester, dark brown color, resistant to 500,000 cycles of abrasion test.

Lacing system

Consisting of a combination of 6 pairs of special hooks on each shoe. The whole is completed by an elastic pocket, positioned on the side of the shoe where to store the laces.

Insole

Semi rigid PP insole which gives flexibility and stability to the boot.

Footbed

Preformed insole covered with a 100% PL mesh with good abrasion resistance and which allows easy sweat absorption and moisture management.

The base is made of 100% highly breathable, lightweight, open cell polyurethane foam that does not lose shape and easily absorbs and desorbs sweat.

Outsole

Tricomponent cemented sole, with double density PU midsole and nitrile rubber tread, SRC anti-slip, heat resistant to 300 ° C, antistatic, resistant to oils and hydrocarbons and to abrasion with energy absorption on the heel. The sole is designed to guarantee grip and slip resistance on multiple types of terrain. The side profile includes protective pads for the fast-rope activities.

Weight of a pair

Abt. 1500 g (size. 280)

Height at the back

Abt. 19,5 cm (sole included) (size 280)

Size range

Mondpoint MM. 240-335
